SUMMARY

Full Stack Developer with hands-on experience building responsive web applications using Next.js, React.js, TypeScript, Node.js, and Express.js. Skilled in REST APIs, JWT authentication, PostgreSQL, MongoDB, and state management. Experienced in developing end-to-end features, integrating frontend and backend services, and creating scalable user-focused applications.

PROFESSIONAL EXPERIENCE

Full Stack Developer

📅 Feb 2026 - Present

Callsmaster Services LLP 📍 New Delhi

- Developed responsive and reusable user interfaces for a tourism platform using Next.js, React, TypeScript, and Tailwind CSS.
- Designed and developed the City page from scratch, implementing reusable components, responsive layouts, and dynamic data rendering across desktop and mobile devices.
- Integrated RESTful APIs using Node.js, Express.js, and PostgreSQL to support features including taxi booking, search, and recently viewed data.
- Implemented TanStack Query and Redux for server- and client-state management, reducing unnecessary API requests by 30% through caching and optimized data fetching.
- Contributed to migrating a WordPress-based tourism platform to Next.js, modernizing the frontend and backend architecture and improving page performance by 20% through optimized rendering, API integration, and reusable components.

PROJECT EXPERIENCE

The Thai Tourism

- Developed City, Product, and Attraction pages with reusable Next.js and React components, improving consistency across 10+ tourism pages and ensuring responsive layouts across desktop and mobile devices.
- Built and integrated a Taxi Transfer REST API using Node.js, Express.js, and PostgreSQL.
- Implemented dynamic Attraction and city-based content rendering, integrating APIs with TanStack Query and Redux to efficiently manage server-side and application state.

Movie X [Live](#) 🔗

- Developed a responsive movie and TV streaming platform using Next.js, React, Tailwind CSS, and TypeScript, implementing 5+ core browsing features including trending, top-rated, search, and category-based content discovery.
- Integrated REST APIs to dynamically fetch and render movie and TV-show data, implementing 10+ reusable UI components for content cards, search results, browsing sections, and detailed views.
- Implemented client-side state and server-state management using TanStack Query, optimizing API data fetching, caching, loading states, and dynamic content rendering across the application.

ArticleX [Live](#) 🔗

- Developed a full-stack blogging platform using React, Node.js, Express.js, MongoDB, and REST APIs, implementing 5+ core features including article creation, editing, deletion, viewing, and user profile management.
- Implemented JWT-based authentication and authorization with protected routes, secure login/logout flows, token validation, and cookie-based session management for authenticated users.

SKILLS

• HTML • CSS • JavaScript • SQL • React.js • Next.js • Tailwind CSS • Node.js • Express.js
• PostgreSQL • MongoDB • MySQL • Bootstrap • Git • GitHub • Postman • VS Code
